

# Dualboot Partners – 10,000 Feet

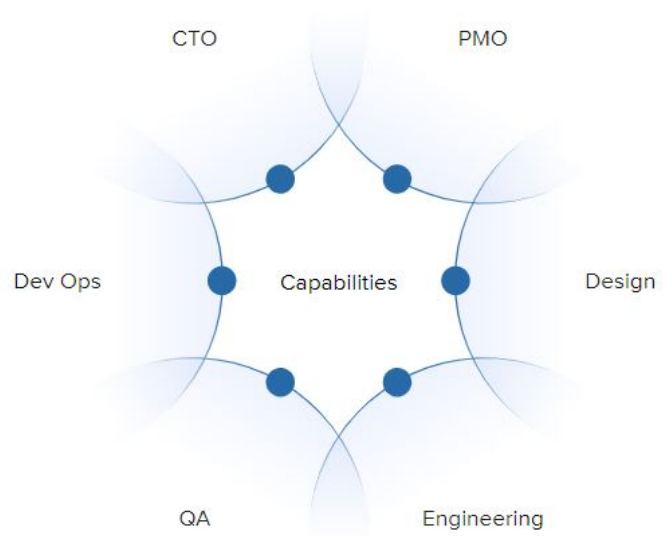

Dualboot Partners works with management teams to deliver digital solutions from strategy through implementation.

## Services

DBP provides strategy, design and engineering services. Depending on the maturity and complexity of the digital product, we have the dexterity to start small or scale fast.

### Example project profiles include:

- Creating MVP platforms positioned to scale
- Increasing the delivery velocity for existing development teams
- Re-platforming legacy systems
- Partnering with non-technical leaders to launch digital products

## Our team has a lot of experience...

- 50+ software engineers, testers, designers and project managers
- Average developer experience: 6.3 years
- Tech Stacks
  - Backend: Ruby on Rails, PHP, Node, Elixir, .Net, Java
  - Frontend: React, Angular
  - Mobile: React Native, Flutter, Android, iOS
  - Salesforce Development / Integration

---

We are entrepreneurs, strategists and technicians with a laser focus on execution and success. Our leadership team has built careers starting, growing and investing in companies. We have a passion for business and an expertise in digital.
