

CURATED SOFT

SOFTWARE AND APPLICATION DEVELOPMENT

Our Services

We are focused on helping our clients grow through digital transformation. We bring real solutions to each client's problems through a deep understanding of their market, solution, and vision.

Custom Software Development

No matter the size of your project, our software engineers and designers will work with you to choose the best software technology to meet your needs. We use a lean development process to help your project succeed.

Software Integration

Our project managers and software engineers will help you understand the potential connection path between multiple platforms or tools, and build that connection for you.

Mobile App Development

Custom mobile application development by our in-house experts. From design to development and ongoing support, custom built from scratch or code-takeover projects.

Business Analytics

Helping our clients achieve strategic, tactical, and operational clarity by improving processes, products, and services through the use of technology.

Salesforce Development

Curated Soft is a proud member of Salesforce Partner community. We help design, develop and customize Salesforce solutions for our clients

Client is King

One of the core values at Curated Soft is "Client is King". We have received awards and went through dozens of training programs for customer service and we are excited to put it to use not only for you, but also your clients

Our Process

01

GETTING TO KNOW THE REQUIREMENTS

We analyze functional requirements, formulate specifications and estimate costs of your future project.

02

PROTOTYPING

We assemble and demonstrate prototype interfaces — if everything looks fine, begin development.

03

DEVELOPMENT

We develop the product in 1-2 week cycles (sprints), by the end of the sprint we show the product demo and plan the next iteration.

04

PROJECT DELIVERY AND WARRANTY SUPPORT

When the development is complete, you get a fully functional project and a 6 month warranty to fix bugs, if detected.

Case Studies

We bring real solutions to each client's problems through a deep understanding of their market, solution, and vision.

Smart Coach

Personal Trainer and Nutritionist Assistant

Apple and Android stand-alone application has been developed in which the trainer can maintain a client base, weekly training plans for various muscle groups, and a meal plan for clients.

EXJEX & TruckingEx

Freight futures exchange platforms

Carriers and intermediaries publish their Trucking and Air load offers with prices, and customers can choose the most suitable option using a simple search form.

P2P Lending platform

Online platform for peer-to-peer money lending

Our developers created a unique online platform for P2P lending, logo, and other visual symbols of the startup.
