CED  
LIFE SCIENCE  
CONFERENCE

February 28-March 1, 2017 | Raleigh Convention Center

**CED AgTech Pre-conference Workshop:  
“Precision Agriculture: Will Data-driven Ag  
Save the World’s Food Supply?”**

Tuesday, February 28 – 9:00am-10:15am  
Raleigh Convention Center, Room 306

Sponsored by:

Precision agriculture and the use of data-driven ag technologies – perhaps analogous to precision medicine or data-driven medicine – offers promise as a potential answer to the impending global food crisis. The Precision Agriculture panel will feature a panel discussion offering perspectives from key local players in the ag industry, who will each share insights on the unique opportunities and challenges associated with precision agriculture.

Moderated by Jason R. Brege, Partner, Smith Anderson, and featuring panelists:

- Bill Barton, Chief Operating Officer, XS, Inc
- Isaac Boerema, Boerema Farms
- Paul Skroch, VP, Data Science & Platform Engineering, Benson Hill Biosystems
- Mohan Tavorath, Principal, Data Sciences, International Farming Corporation
- Paul Ulanich, Ph.D., Executive Director, Biotechnology Crop Commercialization Center, NCBiotech

**This workshop is open to both CED Life Science Conference attendees and non-conference attendees. **RSVP is required for non-conference attendees only.****
