CED
LIFE SCIENCE
CONFERENCE

February 28-March 1, 2017 | Raleigh Convention Center

**CED AgTech Pre-conference Workshop:
“Precision Agriculture: Will Data-driven Ag
Save the World’s Food Supply?”**

Tuesday, February 28 – 9:00am-10:15am
Raleigh Convention Center

Sponsored by:

Precision agriculture and the use of data-driven ag technologies – perhaps analogous to precision medicine or data-driven medicine – offers promise as a potential answer to the impending global food crisis. The Precision Agriculture panel will feature a panel discussion offering perspectives from key local players in the ag industry, who will each share insights on the unique opportunities and challenges associated with precision agriculture.

Moderated by Jason Brege, partner and co-lead of Smith Anderson Law Firm’s AgTech practice, and featuring panelists:

- Mohan Tavorath, IFC Principal, Data Sciences
- Rick DeRose, Syngenta
- Paul Ulanich, North Carolina Biotechnology Center
- Bill Barton, XSI Inc

This workshop is open to both CED Life Science Conference attendees and non-conference attendees. **RSVP is required for non-conference attendees only.**
